premec

Product Summary 2024

Thanks to its experience and know-how in precision mechanics, Premec is able to satisfy the specific demands of the writing industry.

Tips, inks and refills are engineered and developed to cover the different needs of writing components with uncompromising quality.

SVHC compliance?

In June 2018 lead (Pb) has been included in the SVHC List of Substances of Very High Concern when its mass content is higher than 0.1% (REACH). In the US, CPSIA 2008 regulation limits the mass content for lead to max. 0.009%. Demanding challenges. Raw materials commonly used to manufacture tips (brass, nickel silver - copper alloy - and stainless steel) surpass significantly these limits.

No problem. At Premec lead-free tips are the new standard.

Excellent performance and stability

Our stainless steel lead-free alloy tips guarantee the same resistance against corrosion when compared to stainless steel tips with standard lead content. Compared with ball point tips manufactured in BNP and NS, switching to stainless steel lead-free alloy tips allows for a series of relevant performance improvements:

- Premec lead-free tips made in steel appear in an elegant silver matt tone that does not change over time
- They are less exposed to corrosion even by accidental contact with various chemical solutions.
- For high power refills such as Parker Metal (5 km writing length) the use of lead-free tips made in stainless steel (SS/10) ensure a uniformity of writing until the end of charge: they are more reliable while guaranteeing the constant level of high performance.
- They are more robust both in terms of abrasion of the rim on the paper and the abrasion made by the ball during the rotation in the tip housing.
- Like all tips made in stainless steel our lead-free tips show an excellent starting.

For all systems. Sustainable and consumer friendly.

Tips made of Premec's new stainless steel lead-free alloy are used to manufacture a wide variety of existing and new design tips:

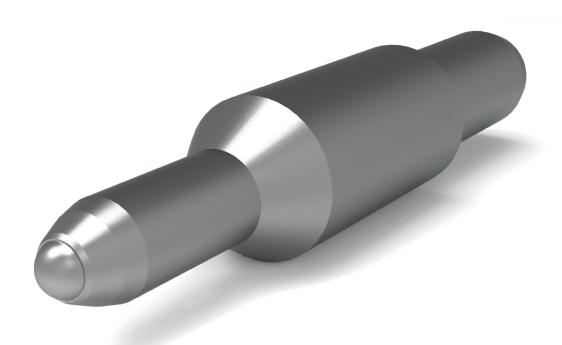

- Any type of gel tip, with and without spring loaded, without limitation of ball diameter
- Any type of roller tip, without limitation
- A very wide variety of ball point tips to match all high and medium viscosity inks and the majority of the low viscosity inks

| Tip family | Ink | Ball ø (mm) |
|------------|--|---------------------------|
| Gel | No limitations | 0.3 - 1.0, no limitations |
| Roller | No limitations | 0.5 - 0.7, no limitations |
| Ball Point | No limitations in terms for High/Medium viscosity inks | 0.6 - 1.6 (0.5 tbc) |
| | Low Viscosity inks may show constraints for ball diameters inferior to 1.0 mm. | |

No limitations in terms of shape, conical or needle

Continuous fiber intake significantly reduces the performance of the writing instrument.

Not anymore. Now there is <u>AFIT</u>.

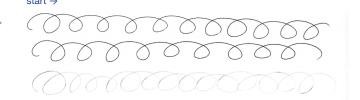

An innovation from the laboratories of Premec in Cadempino, Switzerland

AFIT. The revolutionary Anti-Fiber-Intake-Tip

New AFIT. For maximum customer satisfaction. When paper and tips interact, fibers are taken into the tips and tend to progressively reduce the performance of the system. The innovative Anti-Fiber-Intake-Tip from Premec offers a cost-effective solution to this problem. In combination with Easyfluidal and Easyfluidal.1 Dokumental Ink, AFIT not only guarantees that no fiber is taken into the tips anymore. It also provides an extremely smooth writing experience with extremely well defined and intense colours and lines until the refill is completely consumed.

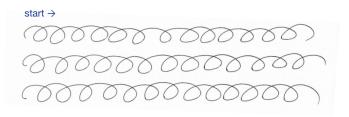

A unique performance that translates into significantly more reliable and sustainable products with a longer lifetime and a higher customer satisfaction.

Standard refill

Refill with new AFIT

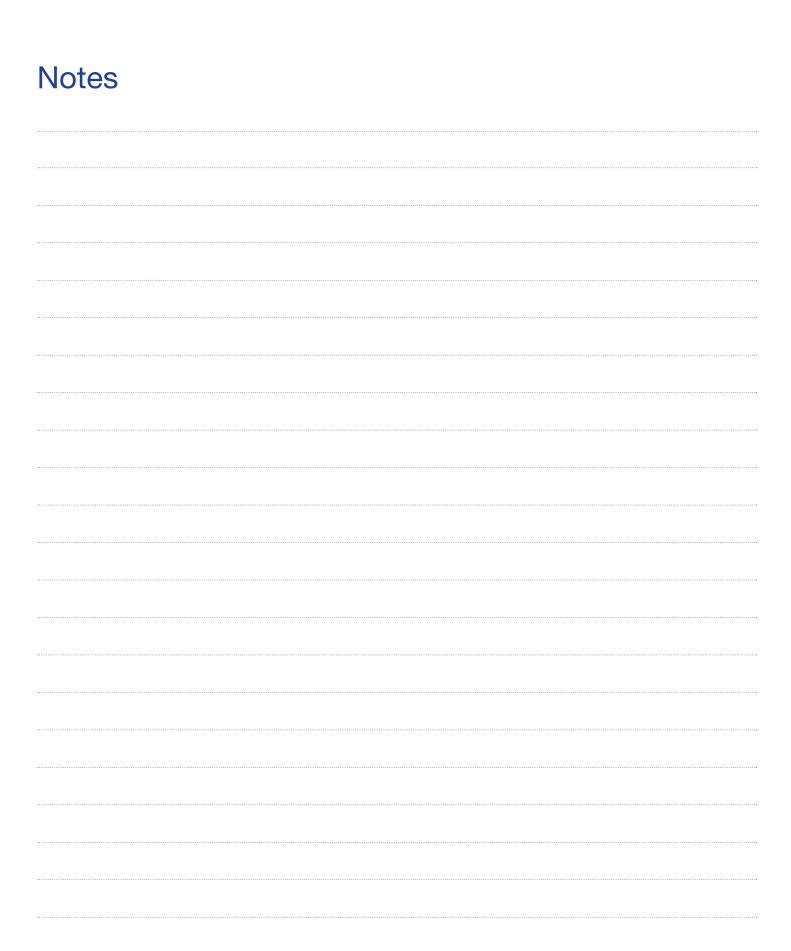

AFIT – your cost-effective solution for:

- · Super smooth writing feeling
- Higher customer satisfaction
- Longer lifetime
- More reliable
- Higher sustainability

Material and sizes

| Ball material | Ball ø (mm) |
|---------------|-------------|
| NS | 0.7 |
| NS | 1.0 |
| SS | 1.0 |

New AFIT by Premec can be combined with both stick and retractable pens. Also available as refill. Contact your Premec sales representative for more information.
