Material Safety Data Sheet (MSDS)

After consulting of the legal office of the European Commission, EWIMA (European Writing Instrument Manufacturer's Association) members follow the European legislation on chemicals (REACH), which stipulates mandatory use of MSDS for preparations / substances but not for articles. Refer to: Article 31, of Regulation EC No 1907/2006 of the European parliament and of the council of 18 December 2006.

Tips are considered as articles, so that there isn't any obligation to issue MSDS. Ink is a preparation, therefore there is the legal obligation to issue MSDS. Refills and pens are considered articles that release a preparation: in that case there is the obligation to issue MSDS for ink.

Information on substances in articles have to be delivered, if the article contains substances of very high concern (SVHC). Premec confirms the SVHC content in the Technical Data Sheet (TDS) for the corresponding item. AT the last update(17/12/2015) of the SVHC list, any SVHC is contained in our tips, refills, pens and inks.

The Premec's technical staff remains at your disposal in case you need additional information.
